[6] Added before rule 11 became clear.

[7] Jump by BacconSkilled

[8] This jump got into the list despite the rule against buffed versions of other jumps on the list due to the jump being estimated to be top 1 back when it was verified, which ended up never being the case. This will NOT happen with other jumps, even if they do end up being top 1 difficulty.

[10] The legacy list placements may not be updated unless a rating is very severely inaccurate.

[11] Located under the ground.

[12] This jump was verified before the rule against wallhops/wallwalks was specified, so this jump is allowed as an exception.

[13] This jump was originally "verified" (faked) in 2023. It was allowed into the list due to incompetent list moderators who didn't know about the rules back then. However, we have decided to keep this jump here for its legacy.

[14] Added before rule 11 became clear.

[15] The correct version of the jump is to the right when you join.
